Skewed Left

Skewed Right

Posterior probability density and 66% credible intervals for the optimism parameter (on the logit scale), marginalised over participants

The model estimates the optimism parameter to be greater than 0.75 (1.1 in the logit scale) for 30/71 participants in the **Ensembles Skewed Right** conditions

The model estimates the optimism parameter to be less than 0.25 (-1.1 in the logit scale) for 65/71 participants in the **Ensembles Skewed Left** conditions, and 12/71 participants in the **Ensembles Skewed Right** conditions
